How to access eMap Bushfire

To access eMap Bushfire, you need to be assigned the **Login Role: Mapping (MAP)**

Please refer to the *FireWeb | Mapping* section on how to seek approval for this Login Role access

NOTE: eMap Bushfire can only be accessed if you are using a PC or device connected to one of the following Networks: DELWP, PV, CFA, SES, MFB, (VicForests are on a DELWP Network)

1. Log-in to eMap Bushfire via FireWeb | Mapping Section, then Double-click the **eMap** blue title-bar strip

or type in URL - <https://emap.fem.vic.gov.au>

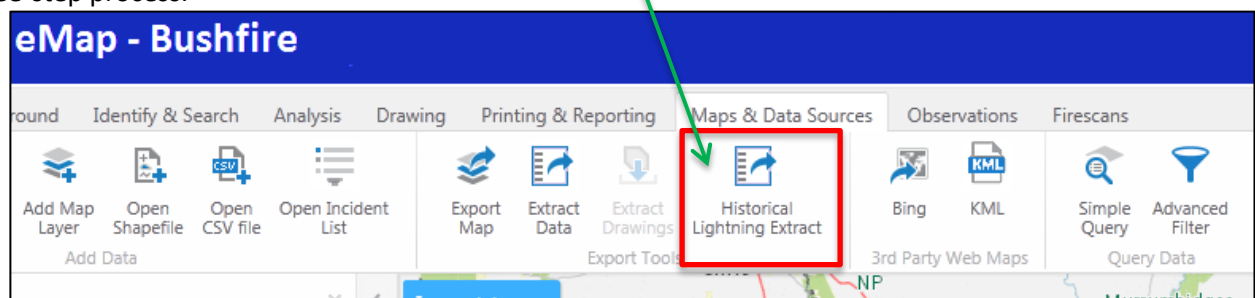

2. Click on **Bushfire**

How To Extract Historic Lightning Data using eMap Bushfire application

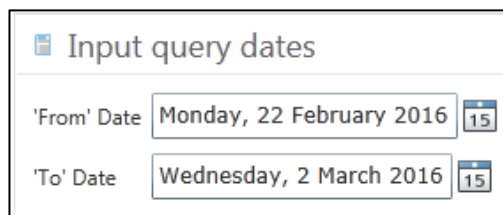

3. First Open the **ToolBar** and the **Information Pane**, then Zoom into your Area of Interest

4. Click the **Maps & Data Sources** tab, then click on the **Historical Lightning Extract** button, which will initiate a three-step process:

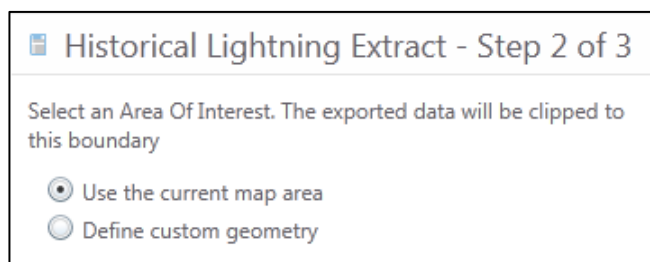

- i) Using the Calendar tools, choose your **'From'** and **'To' Dates**.

NOTE: Date range must **not** span **more** than twenty-eight (28) days – e.g. below will work fine...

- ii) Click  to display Step 2 of 3...

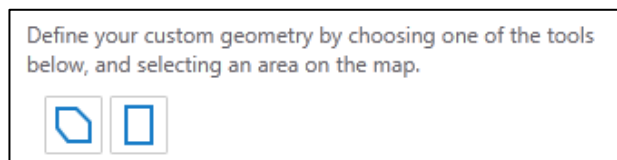

NOTE: The area you can request lightning for must **not** exceed 10,000 hectares ... you can either:

Ⓐ **Use the current map area** (if you're zoomed in sufficiently close), OR

Ⓑ **Define custom geometry** which will then let you define an area on the map via a drawn polygon or rectangle...

Remember to complete / enclose your area, finishing with a double-click.

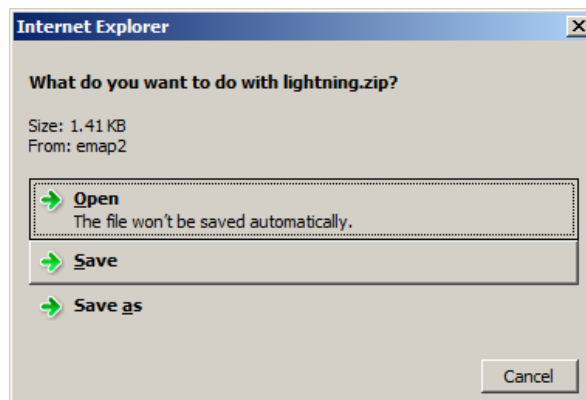

- Click  to extract the lightning data for your Area of Interest, and display Step 3 of 3...

Will take some minutes. Note the spinning circular icon...

- iii) When presented with the following dialog box, choose to **Save As**

- Confirm you wish to **Open** the file...

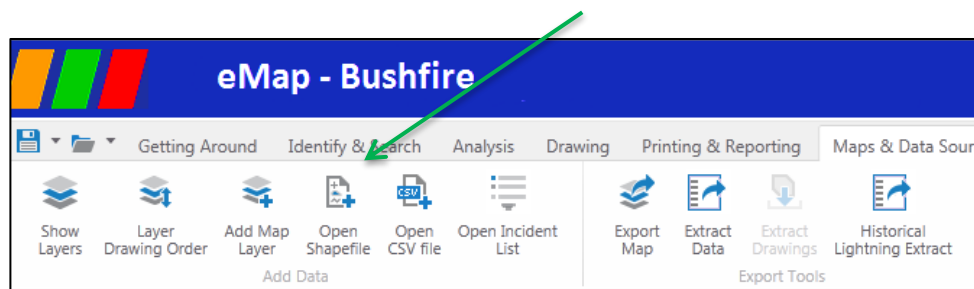

- You will end up viewing the contents of a file named **Lightning.zip** which will look as shown:

NOTE: The shapefile is in GDA94 projection

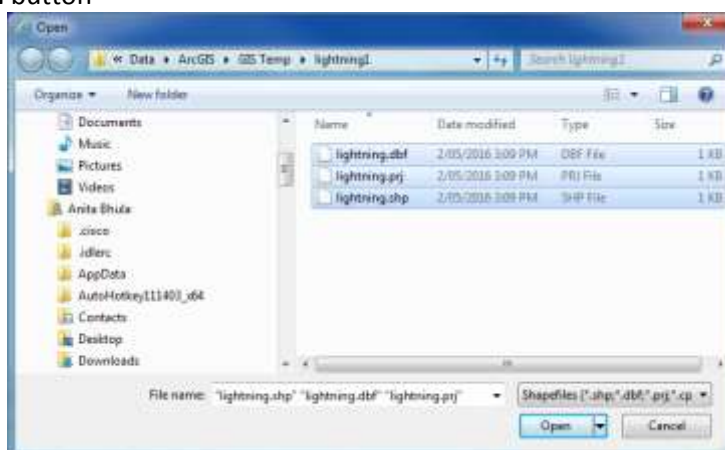

Name ^	Type	Compressed size	Password p...	Size	Ratio	Date modified
lightning.dbf	DBF File	1 KB	No	1 KB	0%	2/03/2016 4:16 PM
lightning.prj	PRJ File	1 KB	No	1 KB	0%	2/03/2016 4:16 PM
lightning.shp	SHP File	1 KB	No	1 KB	0%	2/03/2016 4:16 PM
lightning.shx	SHX File	1 KB	No	1 KB	0%	2/03/2016 4:16 PM
metadata.txt	Text Document	1 KB	No	1 KB	0%	2/03/2016 4:16 PM

How To view the shapefile in eMap ...

- Click the **Maps & Data Sources** tab, then click on the **Open Shapefile** button ...

- Browse to the location where you saved your shapefile – *LightningClip.shp*
select all three file formats - .dbf, .prj, .shp
then click the **Open** button

- You can change the symbology for this shapefile, just click on the layer name.
